Appendix-1

Brief about the Sector in which the CPSE is operating and national and international environment, regulatory environment/ benchmarks etc.

As per World Steel Association forecast – SRO October 2018, global steel demand in 2019 is expected to be moderate with a growth of 1.4% in 2019 as against 3.9% in 2018, which is mainly due to uncertainty arising from trade frictions between China & US and volatile currency movements. Chinese steel demand is expected to decelerate unless stimulus measures are taken by Chinese Govt. to contain the potential slowdown of the economy. India's steel demand is expected to be healthy with a growth rate of 7.3% as against 7.5% in 2018.

RINL operates exclusively in Long products segment with major share (>85%) of products belonging to Bars & Rods category, where more than 65% of market share is occupied by secondary players.

As per JPC reports, in Bars & Rods category, during the period Apr-Sep'18, there was 11.0% increase in consumption due to better demand conditions. However, the prices remained flat during the period with stiff competition from secondary sector which leveraged on its available unused capacities and lower global prices of scrap and registered a production growth of 10.2% as against 4.5% by Main producers. The import of scrap increased by 29% during the period Apr-Sep'18.

Also, on raw material front, there has been a 16% increase in prices of IOF and 22% in the price of IOL between Apr and Sep' 18. Also prices of Australian coking coal (FOB - \$/t) is showing a rising trend from Aug'18 onwards and is currently 30% above the levels of Aug'18 and depreciation of Rupee has further added to the adverse impact.

Even with improved demand conditions, long product segment prices are not expected to go up any further due to strong competition from secondary sector in India and rising raw material prices pose a real threat to the margins.
